

C13-Improvements to Town of Snowmass Village Transit Center, \$*

(Hyperlink to ITSP Alternatives & Cost Estimates, click above link)

Project Description:

The Town of Snowmass Village intends to redesign and upgrade the transit center at the Snowmass mall. The project known as alternative “Q” is intended to combine RFTA service and the Snowmass Shuttle service into one location on parking lot 6 between Daly Lane and Elbert Lane. The project is intended to improve transit service and customer amenities to the mall area.

Project Cost Estimate:

Total Project Cost - \$12,860,000

RFTA Contribution - \$500,000

Special Considerations:

The concept and cost estimate for this project comes from a study done by TOSV (MK Centennial) in 2000 and some of the programmed elements of this project may have changed over time. The cost estimate will need to be updated once the programming for this project has been refreshed.
